DETAILED ACTION

Reissue Applications

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,868,123 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

The reissue oath/declaration filed November 13, 2002 with this application is defective (see 37 CFR 1.175 and MPEP § 1414 and 1414.01) because of the following:

The oath/declaration must be signed by all inventors, *i. e.*, each signature, if supplied on a separate sheet as is the case here, must be part of a complete oath/declaration. Therefore, three declarations, if signed by a single co-inventor as in the above-noted declaration, would be required in this application.

Claims 1-18 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Conclusion

Claims 1-18 define patentable subject matter over the art of record.

Art Unit: 3747

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

The documents pertaining to amorphous metal alloys made of record and not relied upon are considered pertinent to applicant's disclosure.
